SUMMARY

MERN Full Stack Developer with strong fundamentals in programming and web development. Skilled in building scalable web applications and RESTful APIs using React, Node.js, Express, and MongoDB. Experienced in developing responsive user interfaces, designing clean backend architecture, implementing security best practices, and optimizing application performance with successful project deployments.

PROJECTS

1. Local-Service-Web-Application — Full-Stack Platform [Live Demo](#) [GitHub Repo](#)

MERN Stack, React Router, JWT, bcrypt, Mongoose, Axios, React Hook Form, Material UI, RESTful APIs

- Developed a full-stack web application where users can find and connect with nearby service providers like electricians, plumbers, and AC technicians, with search and filter features based on location and skills.
- Implemented user authentication and security using JWT, bcrypt, and protected routes, and build a profile system to manage user details and pricing.
- Developed responsive UI using React, Material UI, and React Router, and integrated features like image slider using React Slick.
- Created RESTful APIs using Node.js and Express, managed data with MongoDB and Mongoose, and handled forms and API calls using React Hook Form and Axios.

2. GitHub-Explorer — GitHub Repository Search Web-Application [Live Demo](#) [GitHub Repo](#)

React.js, JavaScript (ES6+), GitHub REST API, React Router DOM, CSS, Context API

- Developed a frontend web application where users can search GitHub users and view their repositories by selecting a profile using the GitHub API.
- Implemented debounced search, sorting (stars, forks), and filtering to improve user experience.
- Managed application state (loading, error, empty, data) using useReducer and handled routing using React Router DOM.
- Build reusable components and custom hooks with clean code structure, and implemented light/dark theme using Context API.

SKILLS

Programming Language:	Javascript.
Frontend Technologies:	HTML, CSS, React, Redux Toolkit, React Router, Axios
Backend Technologies:	Node.js, Express, REST APIs, JWT authentication, Middleware, Mongoose
Database:	MongoDB, MySql
Core Concepts:	Data Structures and Algorithms (Basic), Problem Solving
Version Control:	Git, GitHub

EDUCATION

2022 – 2025 B.Sc. in Computer Science, **Govt. Post Graduate College, Noida (CCSU University)**
2021 Class 12th, **Government Higher Secondary School Barigarh, Madhya Pradesh**

COURSEWORK AND ACHIEVEMENT

Completed MERN Full Stack Development Course from AccioJob Skill Center, Noida
